Dear Conference Participant,

We at TASWEEQ are honored to be hosting the **4th LPGtrade summit**, one of the world's most important LPG industry conferences. It gives me great pleasure to invite you to join us in Doha for the summit on **9-11 November 2009**. I am pleased to welcome our honorable guests and distinguished panel of speakers coming from all over the world to attend the conference, which is being held under the patronage of His Excellency Abdullah Bin Hamad Al-Attiya, Deputy Premier & Minister of Energy & Industry of Qatar.

The **4th LPGtrade Summit** convenes in Doha this year in recognition of Qatar's major role in the global petroleum industry. Qatar is currently the largest LNG producer in the world, now producing over 43 million tonnes per annum, and will reach 77 million tonnes per year by 2011. Qatar is also the largest Gas-to-Liquids producer, and is poised to dramatically increase its GTL capacity over the next two years. Along with this growth, Qatar's LPG production will reach more than 12 million tonnes per year by 2012, making Qatar one of the world's leading LPG exporting countries.

As the Host & Sponsor of the **4th LPGtrade Summit**, TASWEEQ affirms its unwavering commitment to the global LPG industry. With our leadership position comes the responsibility to help the industry grow and develop efficiently and responsibly. Tasweeq's vision is "to be the world's petroleum marketing company, delivering Qatar's energy to the Globe, Reliably, Efficiently and Responsibly. We create value for our stakeholders by capitalising on our world-class employees and best practices". We believe that our active participation in this conference helps us to achieve that vision.

During your visit to Qatar I am pleased to invite you to visit the Ras Laffan Industrial City (RLC). Gas production at Ras Laffan will reach 23 billion cubic feet a day by 2012, and it represents one of the single largest concentrations of capital investment in the world. Ras Laffan is the future of the LNG and LPG business in the Middle East, and will play a crucial role in meeting the world's energy needs for decades to come.

At the **4th LPGtrade Summit**, you will hear from OPEC's Secretary General, His Excellency, Mr. Abdullah El-Badri, and speakers from over a dozen producing and consuming countries on the outlook for production, demand, and key issues facing the LPG business in the coming years. The conference also features presentations from the world's leading oil companies, including **ExxonMobil**, **Shell**, and **ConocoPhillips**, discussing their outlook for the LPG business as it relates to the other major energy uses such as LNG and petrochemicals.

I welcome you and your spouse to join us in Doha where you will find Qatar's legendary Arabian hospitality waiting for you at the **4th LPGtrade Summit**.

Sincerely,

Ali Al Hammadi
Chief Executive Officer
Qatar International Petroleum Marketing Company Ltd. (Tasweeq)
